

Cristian Garza

OSCP CERTIFIED PENETRATION TESTER · SOFTWARE ENGINEER

Houston, Texas

✉ garzacristianm@gmail.com | 🌐 app.hackthebox.com/public/users/1278586 | 🌐 cristian-garza-6b639b14b

Professional Summary

OSCP-certified offensive security professional and software engineer with 4+ years of experience developing, deploying, and securing applications and infrastructure. Experienced in penetration testing methodologies, Active Directory security, Linux administration, web application assessment, cloud environments, and security automation. Combines a software engineering background with hands-on offensive security experience to identify vulnerabilities, understand root causes, and communicate effective remediation strategies.

Experience

Texas Center for Cell Therapy and Research

San Antonio, Texas | Remote

CYBERSECURITY CONSULTANT

Sep. 2025 – Present

- Completed the OSCP certification, strengthening expertise in vulnerability assessment, exploitation, and post-exploitation methodologies.
- Implemented endpoint encryption and secure system configurations on employee laptops using BitLocker.
- Configured and deployed internal email server infrastructure, improving organizational communication reliability.
- Provisioned, maintained, and troubleshooted employee workstations and office IT systems.

CyManII

San Antonio, TX

SYSTEMS SOFTWARE ENGINEER

Dec. 2023 – Sep. 2025

- Developed and maintained software tools supporting cybersecurity research initiatives focused on industrial and manufacturing environments.
- Built and managed containerized environments using Docker and Docker Swarm for deployment, testing, and security research workflows.
- Designed and automated testing and validation pipelines using Python and JavaScript, reducing manual QA overhead.
- Collaborated with government, academic, and industry partners on cybersecurity resilience projects targeting critical infrastructure.
- Contributed to internal documentation and knowledge sharing efforts across research teams.

Cariloop

Remote

FULL STACK SOFTWARE ENGINEER

Jul. 2021 – Apr. 2023

- Developed and maintained full-stack web applications using TypeScript, Angular, and Loopback 4 in an agile environment.
- Designed and implemented RESTful backend services and third-party integrations while adhering to secure development practices.
- Deployed and managed production applications on AWS using Docker, Linux, and Nginx, ensuring high availability.
- Participated in code reviews and contributed to engineering standards to improve code quality and maintainability.

Infosys

Remote

SOFTWARE DEVELOPMENT INTERN

Jun. 2020 – Aug. 2020

- Built an internal HR hiring application within Microsoft Teams using HTML, Bash, Azure, and SharePoint.
- Integrated automated workflows to streamline candidate tracking and reduce manual HR processes.
- Documented findings and regularly presented project updates to stakeholders and management.

Certifications

2026 **Offensive Security Certified Professional (OSCP)**, Offensive Security

2023 **CompTIA Security+**, CompTIA

Education

The University of Texas at Austin

Austin, TX

B.S. COMPUTER SCIENCE, CYBERSECURITY CONCENTRATION

May 2021

Technical Skills

Offensive Security	Burp Suite, Metasploit, BloodHound, Impacket, SQLMap, Wireshark, NetExec
Programming	Python, JavaScript/TypeScript, Bash, C/C++, Java, C#
Infrastructure	Docker, Docker Swarm, AWS, Linux, Nginx
Web Technologies	Angular, React, Loopback 4, SQL, MongoDB
